SOS Emergency Card

Your Medical Information – Always With You. Always Accessible.

Why Carry an Emergency Card?

In a medical emergency, **every second counts**. When you're unable to speak for yourself, the SOS Emergency Card gives first responders, paramedics, or hospital staff immediate access to your vital information via QR code – safely stored and instantly available.

Key Benefits

- Quick emergency access**
The QR code links directly to your secure medical profile. No app needed – works with any smartphone.
- Fits in your wallet**
Durable and compact – same size as your bank card.
- Essential information on the card itself**
 - ✓ Full Name
 - ✓ ID / Passport Number
 - ✓ Medical Aid
 - ✓ Blood Group
 - ✓ 3 Treating Doctors
 - ✓ 3 Next of Kin (emergency contacts)
- Data privacy & security guaranteed**
Your card does not store sensitive files – those stay online, encrypted and securely hosted in a high-security data center on our server in Switzerland.

Optional: Upload Up to 6 Medical Files

With SOS Emergency Card Plus (subscription), you can upload up to 6 important documents:

- Prescriptions
- Advance Directives
- Vaccination Certificate

- Organ Donor declaration
- Medication Plan
- Power of Attorney / Legal instructions

 Formats supported: PDF, JPG, PNG

 Receive automatic reminders before a prescription expires:

- 14 days prior
- 7 days prior

 **Perfect for hospital stays**

You're often asked about your **chronic medication** – with the Emergency Card, you always have your answers at hand.

 Starting at just **R39.50/month**

Why it matters

More than **1 million people in Switzerland** already benefit from carrying an Emergency Card – especially seniors, patients with chronic illness, and anyone who wants peace of mind.

Limited-Time Offer

 **Now only R199 instead of R249**

 Scan the QR-code on the flyer and order your personal Emergency Card today.

 Delivered within **72 hours** to your doorstep.

We're happy to help you place an order – for yourself, your partner, or family.
Group & retirement home packages available.

 **SOS Emergency Card – Your Life. Your Data. Protected.**
Data Stored on high-security servers in Switzerland.

Plegium SOS Button

A Silent Call for Help – Always With You

 **Introductory Price: R695**

What Is It?

The **Plegium SOS Button** is a small, lightweight emergency device you can carry on your keychain, around your neck, in a handbag, or attach to a walking frame or schoolbag.

With just one simultaneous press on both sides of the button, you can instantly alert up to two trusted contacts – without speaking or touching your phone.

Who Is It for?

It's ideal for:

- Seniors living alone
- People at risk of falling or sudden illness
- Individuals who want discreet, reliable safety
- Children on their way to school or at the playground
- Hikers, joggers, or anyone active outdoors
- Families who want peace of mind

How does it work?

1. Download the free **Plegium app** (Android / iOS)
2. Pair the button once via Bluetooth
3. Enter 2 emergency contacts (e.g. family, neighbours, friends)
4. In an emergency: press both sides of the button at the same time

The button connects via Bluetooth to your phone. The app then immediately:

- Sends an SMS with your live GPS location

-  Places a call to both contacts
-  Sends a push alert via the Plegium Cloud System

You don't need to unlock your phone, dial, or say a word – it all happens automatically within seconds.

Important: Bluetooth & Phone Visibility

To work correctly, the Plegium Button must be within Bluetooth range of your smartphone, (no walls in between).

That means:

- Your phone must be turned on, with Bluetooth and mobile data enabled
- Your phone should be within sight or close to your body (e.g. in a bag, on the table, in a pocket)

If your phone is too far away, off, or not connected – the button cannot send the alert.

 **Best practice:** Always keep your phone nearby when using the SOS Button – especially when alone or outside.

Other Technical Features

-  Uses almost no data – all messages go through Plegium's cloud
-  No SMS or call charges for the user
-  No subscription or monthly costs
-  Battery lasts up to 4 years – no charging needed
-  App is completely free
-  Lightweight and discreet (wear or carry it anywhere)

Frequently Asked Questions

Do I need to charge it?

→ No. The built-in battery lasts up to 4 years.

What if both contacts don't answer?

→ They'll still receive your alert and live location by SMS.

Does it work without mobile data?

→ No. Your phone needs mobile Internet to contact the Plegium cloud.

Can I use it outside South Africa?

→ Yes, it works globally – as long as Bluetooth and mobile data are available.
